Model Name: Velox LE 5850

APPENDIX C: DESCRIPTION OF CHANGE

Please refer to the following page.

22 January 2004

To Whom it may concern:

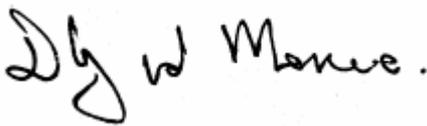

Dear Sir/Madam,

Re: ATCB Class II Permissive Change to the Orion 5825 SR
- the upgraded system is renamed to Velox LE 5850 SR

The Velox LE 5850 SR was firmware upgraded from the Orion 5825 SR to enable higher payload data rates while the hardware remained unchanged.

- 1) The software configurable modem can now also handle 32QAM;
- 2) This improvement doubled data capacity to 50Mbit/s

Yours faithfully
For Stratex Networks

Douw van der Merwe
Technical Director
BroadBand Wireless Division
