Re: FCC ID: ONTJETIR11EPCUS

To Whom It May Concern:

The following application is submitted on behalf of our client, Esprit Model, for evaluation of their model JETIR11EPCUS for certification under FCC Part 15.247.

The JETIR11EPCUS is a 2.4 GHz transceiver for remote control toys. The unit hops continuously among 15 non-overlapping channels in the 2405 MHz to 2475 MHz frequency range using a Jeti proprietary application based on the 802.15.4 platform. The FCC ID: ONTJETIR11EPCUS includes multiple model variants in addition to the JETIR11EPCUS, which are JETIR9US, JETIR7US, JETIR6LUS and JETIR6iUS. The additional model variants consist of the depopulation of I/O ports, different enclosure and shortened antenna cable length from based model JETIR11EPCUS.

The FCC ID: ONTJETIR11EPCUS was tested in full for the Model JETIR11EPCUS to the aforementioned tests requirements and was found to be in compliance. The applicant Esprit Model declares the model tested as the worst case and the aforementioned model variants compliant based on similarity.

Sincerely,
