

Exhibit 1

As described in previous correspondence (letter dated 6/24/99), Lockheed Martin Corporation has sold its Sanders Telecommunications Systems business to Transcept, Inc., a newly formed affiliate of Spencer Trask & Company.

The hardware products that are affected by this change are the PCS-over-Cable products covered by the following current FCC identifiers:

- L5H94117V190A
- L5H94117V190B
- L5H94117V190C

Per 47CFR2.933, this application for authorization is to document the new equipment identification, which consists of the change in grantee code.

The equipment bearing the new identification is the same as the original equipment. The test results originally measured and submitted continue to be applicable to the newly identified equipment.

Transcept assumes full responsibility for maintaining compliance of the equipment with all applicable FCC Rules.
