
EXHIBIT 1 REQUEST FOR CONFIDENTIALITY

This application for equipment authorization contains technical data that would normally be guarded from competitors. Specifically, Exhibit 3 (System Theory and Description), Exhibit 4 (Block Diagrams) and Exhibit 5 (Schematics) contain descriptions of state-of-the-art technology that OpenCell Corp. has developed at considerable expense.

Dissemination of this information to the general public may provide enough technical information to permit duplication of device hardware and functional performance, and could thereby cause serious damage to OpenCell Corp.'s competitive position.

In accordance with 47 CFR 0.457 and 0.459, OpenCell Corp. therefore requests that Exhibits 3, 4, and 5 be withheld from the public record.

Ross Hicks

Vice President of Engineering
OpenCell Corp.
