

QUESTIONS:

We have completed our review and the following issues were identified:

1. Please provide data responsive to the 15.31(e) requirement for input voltage variation.
2. Please specify the label material.
3. The report specifies that testing was conducted with a shielded RS-232 cable. The users manual does not specify a shielded cable should be used when connecting to the RS-232 port. Please supply a corrected users manual.
4. The users manual RF exposure statements do not refer to the EUM. Please supply a corrected users manual.

Best regards

Barry C. Quinlan  
Certification & Telecom Manager  
Curtis-Straus LLC

ANSWERS:

Dear Barry,

We have compiled a response to your e-mail dated February 19, 2001.

- 1 - We have revised our report and attached revision A for your review.
- 2- The material used for the Regulatory label is Mylar. Its adhesive is manufactured by 3M, part #467MP.
- 3 - We have revised two pages in the user manual and attached them for your review.

Regards,

Desiree
