ASTRON specializes in designing and manufacturing custom antennas. If this particular antenna does not meet with your requirements, Astron can provide you with other antenna solutions optimized to your specific application. This antenna is available in various frequencies.

Advantages

- A wide bandwidth Yagi with maximum gain-to-boom length ratio.
- An excellent choice for telemetry and security monitoring.

Features

- "EverSealed" feed system which insures against system failures due to moisture.
- Square boom construction for greater strength and solid aluminum rod elements.
- Flexible feedline interface with custom cable lengths available for easier, reliable installation.
- No field tuning required.
