Test Conditions / Notes: 3 Different Transmitter Models Set To Different Channels

The Transmit/Receive Assemblies are transmitting data received from the remote HUB (4 TRA's) and the Remote Indoor Unit (remaining TRA 38-22) through the local ODU. The TRA's channel settings are as follows: 38-22 CH0, 31-11 CH0, 28-22 CH0, 28-25 CH51 & 28-35 CH101. The horn antennas on site are on the 28 GHz TRA's and the 31 GHz TRA and are of the 30°, vertical polarization, high gain type. The parabolic dish on site is connected to the 38 GHz TRA and is of the 10" 2° type. Frequency range of investigation = 1 GHz - 40 GHz. The temperature is 60°F. The humidity is 40%.
