Covering letter for FCC Form 731 Attachments

47 CFR 0.457 & 0.459 Request that submitted material be withheld from Public Inspection

FCC ID OQL-R-DS

It is requested that the following exhibits be withheld from Public Inspection:

- Operational Description – “Operational Description.doc”
- Schematic Diagram – “PR004 Schematics.pdf”
- Block Diagram – “Block Diagram.doc”
- Internal Photos – “Internal Photos.doc”

This information is considered to be PAC International proprietary and confidential.

The unit is supplied fully encapsulated in hard potting (two part polyurethane, 50 Shore D hardness). This protects the PCB and coil against deliberate damage and it is not practical, even with tools, to remove the potting without destroying the PCB - the design features are not evident from inspection hence reverse engineering is extremely problematic.

This unit is believed to have a commercial advantage over our competition – revealing details of the design to our competitors would put us at a disadvantage. We therefore request that the above-listed items are withheld from public inspection.

Robert Harvey CEng MIEE
