

To: Paul Shores ITS/ES-Orl
Subject: Triton FCC ID: OQT28SNP-12-02 and FCC ID: OQT29SNP-12-02
Paul:

Technical review of these two applications for certification under Part 101L of the FCC Rules is complete. Both transmitters meet the technical rules for certification. However, certain exhibits must be provided or re-formatted to comply with FCC requirements, as follows:

- 1) parts list needs to be provided - both applications.
- 2) external photos - need a separate exhibit, both applications.
- 3) internal photos - need a separate exhibit, both applications.
- 4) ID label/location - need a copy of FCC label artwork, and indication of label placement on transmitter - both applications.
- 5) RF exposure information - please provide section 5.9 of test report as a separate exhibit, both applications.

The Grants of Authorization for these transmitters will list the frequency range as the center of the lowest operating channel to the center of the highest operating channel, in each band, according to FCC practice. Accordingly, the frequencies will be listed as follows:

FCC ID: OQT28SNP-12-02	
frequency range	emission designator
27, 575 MHz - 28,275 MHz	131MD7W
27,560 MHz - 28,290 MHz	107MD7W

FCC ID: OQT29SNP-12-02	
frequency range	emission designator
29,175 MHz - 29,175 MHz	131MD7W
31,150 MHz - 31,150 MHz	131MD7W

As this differs from the original Form 731 information, the applicant should verify the correctness of this presentation. Certification can proceed as soon as the exhibits listed above are provided.

Thank you,
Roland Gubisch
TCB Manager
