 Press and release the "Connect Button" on the keypad, LED light on the receiver will turn on, indicating that the setup has been completed. Keypad is now ready to use.

Operating the Keypad

- Put Keypad on tabletop, the optical ball is used for moving screen cursor.
- Right and left key beneath/above the Trackball two models can be used for right- and left-handed users.

For Right-handed user

For Left-handed user

3. While the "Num Lock" key is ON (Num Lock LED is flashing). The keypad works as numerical one and its key function is defined as below:

| Num Lock | 1 | * | BkSp |
|-------------|---|---|------|
| 7 | 8 | 9 | |
| 4 | 5 | 6 | + |

| 1 | 2 | 3 | Fator |
|---|----|---|-------|
| 0 | 00 | | Enter |

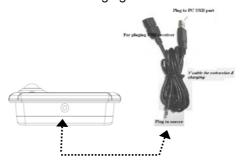

4. While the Num Lock is OFF (Num Lock LED is vanished). The keypad's key function is defined as below:

5.

| Num Lock | | | BkSp |
|-------------|----------|----------|-------|
| номе | ↑ | | - |
| • | | → | + |
| END | - | PgDn | Futon |
| INS | Shift | DEL | Enter |

There are 3 compound keys for use while the NumLock off.

- Shift+END → € (European dollar symbol)
- Shift+Enter \rightarrow e-mail (Open the e-mail)
- Shift+ $+ \rightarrow$ Internet (Open the website)
- 7. When the numeric key or screen cursor remains moving slow or no movement at all, the low battery status indicated. Please plug USB receiver to USB female port of Y-cable and plug USB male of Y-cable to Notebook or PC's USB port, and then insert recharging male to KM-9300/9301.

We suggest to turn off Keypad power (power switch on the back of keypad) when it is not in usage status for saving power.
