Overview

This application is for the original approval of Lightspeed Technologies Model AMP-CAV transceiver with FCC ID: ORVAMPCAV. This transceiver is used in an audio video system intended to be used in a classroom environment and is classified, for RF Exposure evaluation, as a mobile transmitter. The controller will not be used less than 20 cm from any person, however, the output power of the transmitter is low enough that limitations on the separation distance between transmitter antenna and persons is not required. The transmitter operates under FCC rule part 47 Cfr 15.247 as a DTS device.
