## 7. TROUBLE SHOOTING

1) When you can not make conversation by pressing the TALK button of hand-set

- ① Check if the power is connected to the base-set unit properly.
- ② Check whether the telephone line of the base-set unit is connected correctly to the wall plug phone jack.
- ③ Check hand-set unit whether the power ON/OFF switch is on position.
- ④ Check if you press the TALK button after ringing at hand-set unit.
- ⑤ Put the hand-set unit on the cradle of base-set unit at which you will hear a beep sound. If you can not hear this beep sound, please take out the hand-set unit and put on the cradle again until you get the beep sound.
- ⑥ Check if charging LED is lighting. When you get a warning tone for low battery, you must charge the battery fully.

2) When you can not dial tone.

- ① Please check the above points 1 again.
- ② Move the hand-set unit to the base-set unit more closely.

3) When there is an interference and noise.

- ① Check if the charging Led is lighting in the hand-set.
- ② Move the hand-set to the base unit more closely.
- ③ Change the location of base unit to other place.
- ④ Make sure that there is no obstacle near Music phone.  
(Ex: elevator, High power electric line, Electric game machine, or electric fish cage etc.) The telephone should be installed far from these equipments.

\* In case the unit does not work momentarily or can not operate any button even though the power is being supplied, please pull-off the power plug and plug in again.

4) When the hand-set does not ring?

Please check the above points 1 and 2 again.

## 8. CAUTIONS

1) Location of installation

Do not install 900MHz Music phone at following places to use more safely.

- ① Partitioned place with thick wall or steel beam structure.  
(Ex: Elevator)
- ② Exposed place from heat or sunny place by directly.
- ③ Serious vibrating place or dusty or humidity place.

2) Cautions

- ① The battery can be discharged which is normal condition at which set the power On/Off switch of hand-set to ON position then charge the battery fully (about 8 hour) before use.
- ② Wipe the charge contacts of base unit and hand-set with clear clothes regularly for better charging condition.
- ③ When you clean the Cabinet, use 2 or 3 drops of vinegar water, then it will prevent an electric discharge. Do not use benzene or alcohol when you clean the cabinet.
- ④ When you have a severe thunderstorm, you must pull out the power plug.
- ⑤ After finishing of phone call, do not turn off the power switch of the hand-set. If you turn off, you can not receive the incoming call.
- ⑥ If you want not to use for a long period, we recommend to Turn off the Hand-set.
- ⑦ When you hear a warning sound while you are making conversation and the charge Led is lighting, it means low battery so you must recharge the hand-set fully (more than 4 hours).
- ⑧ Do not dis-assemble.
- ⑨ Do not install at humidity & wet place.
- ⑩ After fully charged, you can use 3HRs on talk mode, 5HRs for mode and 12HRs at stand-by mode.
