

## Manufacturer's Declaration

### Unite Pocket Devices:

Unite TP	Unite pocket transmitter
Unite TP-H	Unite pocket transmitter, high performance
Unite RP-H	Unite pocket receiver, high performance
Unite RP-T	Unite pocket receiver with talk-back button
Unite RP	Unite pocket receiver

The Unite pocket devices have the following properties in common:  
Same main PCB, same DECT module, same antenna and same antenna circuitry

These are the differences between the models:

1. The transmitter versions Unite TP & Unite TP-H have additional audio inputs: Line In and Mini XLR for connecting a microphone; this is realized by a different PCBA version
2. The following devices have Bluetooth on board: Unite TP, Unite TP-H and Unite RP-H; But they share the same raw PCB
3. Unite RP-T receiver has a dedicated "talk back" button and is therefore a transceiver with bi-directional audio link.
4. Unite TP + Unite TP-H transmitters have a mute button for muting audio.
5. The versions Unite RP-H & Unite TP-H ("H" stands for high performance) have higher audio output levels and different EQ settings.
