

## In Ear User Guide

In-Ear Hearing Protective Buds with Bluetooth Connectivity

FCC ID: OSF-IE-100

a. Take out the left and right earphones from the charging box, at this time, after seeing that the blue LED of the left and right earphones are lit for 3 seconds at the same time, the blue LED of the left earphone goes out, and the red and blue LED of the right earphone flashes alternately, indicating that the left and right earphones have been automatically connected to each other and are waiting for the mobile phone to turn on the Bluetooth search function to pair with them. At this point, turn on the Bluetooth function of the mobile phone, select the search "Angry Stag IE-100" and click in. The red and blue LEDs stop flashing, and the blue LEDs light up once every 5 seconds, indicating that the connection with the mobile phone is successful and it can be used.

b. b.Hearing on:Take the earphone out of the charging box, and double-click the touch button. At this time, you will hear two sounds of "beep, beep" and the "Hearing" function will be turned on.

c.Hearing pause:Double click the "R" or "L"touch button. At this time, you will hear a beep, and the "Hearing" function will be turned off. Then double-click the touch button again, and the "Hearing" function will be turned on.

d.Bluetooth function:After the headset is connected to the mobile phone with Bluetooth, you can listen to the voice and music signals from the mobile phone through the headset, and pause/play the music by touching the button.When making a call, press the "R" or "L"touch button to answer the call,and then press to hang up.

e.Bluetooth disconnection and connection:Distance between the earphone and the mobile phone is more than 10 meters, you will hear "Disconnected,Pairing", indicating disconnection; After re-entering within 10 meters, you will hear "Didi" indicating successful reconnection.

f.Charge for headset:When the headset is put into the box, the 4.2V output will charge the headset, and the headset will turn red during the charging process, and the full light will go out.

g.Charge for box:Micro-USB interface charges, and 4 LEDs show the charging status. During the charging process, the LEDs are flashing and full, and 4 LEDs show full light.

h.FCC Warning statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two

conditions:(1) This device may not cause harmful interference, and (2) this device must accept

any interference received,including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance

could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device,

pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection

against harmful interference in a residential installation. This equipment generates uses and can

radiate radio frequency energy and, if not installed and used in accordance with the instructions,may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
