

Hi Jim,

We have conducted our review of the application and found the following issue:

1. Please provide data responsive to the Part 15.31(e) voltage variation requirements.

I discussed this issue with Ken in Montreal yesterday.

Best regards

Barry C. Quinlan  
Certification & Telecom Manager

hello Barry,

I have attached a brief document regarding the 15.31 (e) performance of the Intersil access point A2.

let me know if this is sufficient, and if you require anything else.

Will see you in Harvard later this week.
