## TEST REPORT

Report No．：AK027594－001 Date：2008－07－29

## 1 General Information

## 1．1 General Description

The equipment under test（EUT）is a transceiver for Disney Fairies Zone and UM Playhouse Disney．It operates at $2405 \mathrm{MHz} \sim 2470 \mathrm{MHz}$ and the oscillation of MCU is generated by a crystal． The EUT is powered by $2 \times 1.5 \mathrm{~V}$ AAA size batteries．There are four buttons on the controller． When the controller is synchronized with the console unit，the player can play the TV games．

The antenna terminal is permanently attached in EUT and the radio output power is unable to adjust．

The brief circuit description is listed as follows：
－EM198810 and associated circuit act as a transceiver．
－W588D070 and associated circuit act as an U－processor．

## TEST REPORT

Report No．：AK027594－001 Date：2008－07－29

## 1．2 Location of the test site

Radiated emissions measurements are investigated and taken pursuant to the procedures of ANSI C63．4－ 2003．A Semi－Anechoic Chamber Testing Site is set up for investigation and located at ：

> Ground Floor, Yan Hing Centre,
> $9-13$ Wong Chuk Yeung Street,
> Fo Tan, Shatin,
> New Territories,
> Hong Kong.

Conducted emissions measurements are investigated and also taken pursuant to the procedures of ANSI C63．4－2003．A shielded room is located at ：

Ground Floor，Yan Hing Centre，
9 － 13 Wong Chuk Yeung Street，
Fo Tan，Shatin，
New Territories，
Hong Kong．

## TEST REPORT

Report No．：AK027594－001 Date：2008－07－29

## 2 Description of the radiated emission test

## 2．1 Test Procedure

Radiated emissions measurements are investigated and taken pursuant to the procedures of ANSI C63．4－2003．

The equipment under test（EUT）was placed on a non－conductive turntable with dimensions of $1.5 \mathrm{~m} \times 1 \mathrm{~m}$ and 0.8 m high above the ground． 3 m from the EUT，a broadband antenna mounting on the mast received the signal strength．The turntable was rotated to maximize the emission level． The antenna was then moving along the mast from 1 m up to 4 m until no more higher value was found．Both horizontal and vertical polarization of the antenna were placed and investigated．

For below 30 MHz ，a loop antenna with its vertical plane is placed 3 m from the EUT and rotated about its vertical axis for maximum response at each azimuth about the EUT．And the centre of the loop shall be 1 m above the ground．

The device was rotated through three orthogonal axes to determine which attitude and configuration produce the highest emission during measurement．

## 2．2 Test Result

Both Average and Peak Detector data were measured unless otherwise stated．
＂\＃＂means emissions appearing within the restricted bands shall follow the requirement of section 15.205 ．

The frequencies from fundamental up to the tenth harmonics were investigated．The emissions which lower than the radiated ambiance were not reported．Thus，those highest emissions were presented in next pages．

It was found that the EUT meet the FCC requirement．

## TEST REPORT

Report No．：AK027594－001 Date ：2008－07－29

3 Description of the Line－conducted Test

## 3．1 Test Procedure

Conducted emissions measurements are investigated and also taken pursuant to the procedures of ANSI C63．4－2003．The EUT was setup as described in the procedures，and both lines were measured．

## 3．2 Test Result

No measurement is required as the EUT is a battery－operated product．

## 3．3 Graph and Table of Conducted Emission Measurement Data

Not Applicable

## TEST REPORT

Report No．：AK027594－001 Date ：2008－07－29

## 5 Supplementary document

The following document were submitted by applicant，and for electronic filing，the document are saved with the following filenames：

| Document | Filename |
| :---: | :---: |
| ID Label／Location | LabelSmp．jpg |
| Block Diagram | BlkDia．pdf |
| Schematic Diagram | Schem．pdf |
| Users Manual | UserMan．pdf |
| Operational Description | OpDes．pdf |

## 5．1 Band Edges

The plots saved in TestRpt2．pdf show the first and last channels are confined in the specific band． It also shows that the band edges met 15.249 （d）requirements at 2.4 GHz and 2.4835 GHz ．

## 5．2 Duty cycle

Not Applicable

## 5．3 Transmission time

Not Applicable
