FCC Test Report

| Test Result : | PASS* |
|----------------------|--|
| Date of Issue: | 2016-07-08 |
| | 2016-06-16 to 2016-06-18 |
| Date of Test: | 2010-00-00 |
| Date of Receipt: | 2016 06 09 |
| | - Intentional Radiators.(Section 15.227) |
| Requirement: | CFR 47 FCC PART 15 SUBPART C, 2015 |
| FCC ID : | OTM-8405216-27MTX |
| Product Class : | Low Power Communication Device – Transmitter (27.145MHz) |
| Age Grading: | 6+ |
| Country of Origin: | China |
| | tested and which were electrically identical. |
| * | Please refer to section 2 of this report which indicates which item was actually |
| Item No.: | 84011 / 84331 / 84052 / 5F633E3 / 267336 / 228311 / 897143 / 1160483 / 107686 🛧 |
| Product Description: | R/C YAMAHA 2014 RAPTOR 700R |
| Product Information: | |
| | 94 Granville Road, TST, Hong Kong. |
| Address. | |
| Addross | Pm 1201 Inter Continental Plaza |
| Applicant: | KIDZTECH TOYS MANUFACTURING LTD. |
| Application No.: | I31620220028EM |

* In the configuration tested, the EUT complied with the requirements for the relevant clauses of Federal Communications Commission Rules as specified above.

Authorized Signature:

CHEN Jian-feng, Jeffrey

The manufacturer should ensure that all products in series production are in conformity with the products ample detailed in this report. If the product in this report is used in any configuration other than that detailed in the report, the manufacturer must ensure the new system complies with all relevant standards. The report must not be used by the client to claim product certification, approval, or endorsement by NVLAP, NIST, or any agency of the federal government. All test results in this report can be traceable to National or International Standards.

This document is issued by the Company subject to its General Conditions of Service printed overleaf, available on request or accessible at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions.aspxand,for electronic format documents, subject to Terms and Conditions for Electronic Documents at Any holder of this document is advised that in formation contained hereon reflects the Company's findings at the time of its in the vention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exone rate parties to a transaction from exercising all their rights and obligations under the transaction documents. This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or a bisit cation of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 30 days only.

2 Test Summary

| Test | Test Requirement | Test Method | Result |
|---|---------------------------------|------------------|-------------------|
| Conducted Emission (150KHz to 30MHz) | FCC PART 15, SUBPART C: 2015 | ANSI C63.10:2013 | N/A ¹⁾ |
| Radiated Emission below 30MHz | FCC PART 15, SUBPART C: 2015 | ANSI C63.10:2013 | PASS |
| Radiated Emission (30MHz to 1GHz) | FCC PART 15, SUBPART C: 2015 | ANSI C63.10:2013 | PASS |
| Radiated Emission above 1 GHz | FCC PART 15, SUBPART B: 2015 | ANSI C63.10:2013 | N/A ¹⁾ |

Remark : Please refer to section 6.1 & 6.4 of this report for explanation

뢒 ltem no.: 84011 / 84331 / 84052 / 5F633E3 / 267336 / 228311 / 897143 / 1160483 / 107686

According to the confirmation from the applicant, the above models are identical in all electrical aspects in relating to the circuit design, PCB layout, electrical components used, internal wiring and function. The differences are only the model no., color and decorations

Therefore only the model as shown on 7.2 was tested in this report.

This document is issued by the Company subject to its General Conditions of Sewice printed overleaf, available on requestor accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx. Attention is drawn to the limitation of liability, inder militation and jurisdiction is sues defined therein. Any holder of this document is advised that information contained here on reflects the Company's side responsibility is to its Client and this document do bigations under the transaction documents. The Company's sole responsibility is to its Client and this document do bigations under the transaction documents. This document to advise that information contained hereept in full, without prior written approval of the Company. Any unau tho fized alteration, to gery or falsification of the content to appearance of this document is unlawful and offendes may be prosecuted to the full lest extent of the law.

Report No.: T31620220028EM Page: 4 of 23

4 General Information

4.1 General Description of EUT

EUT Name: Item No.: Serial No.: R/C YAMAHA 2014 RAPTOR 700R 84052

4.2 Details of EUT

Power Supply: Power Cord: Antenna type DC 9V (6F22 battery x 1) for TX

Integral antenna

--

Operating frequency: Modulation Type: antenna use unique antenna jack 27.145MHz PCM

4.3 Conditions of EUT

The received sample was under good condition.

4.4 Description of Support Units

The EUT has been tested as an independent unit.

4.5 Standards Applicable for Testing

CFR 47, FCC Part 15, Oct 2015 ANSI C63.10:2013

4.6 Test Location

All tests were performed at: -

SGS IECC Limited (Member of the SGS Group (SGS SA))

Units 303-305, 3/F., 31 Lok Yip Road, On Lok Tsuen, Fanling, N.T., Hong Kong

Tel: +852 2305 2570 Fax: +852 2756 4480.

No tests were sub-contracted.

This document is issued by the Company subject to its General Conditions of Sevice printed overleaf, available on nequestor accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-a-Document.aspx. Attention is drawn to the limitation of liability, inder militation and jurisdiction issues defined therein. Any holder of this document is avised that information contained hereon reflects the Company's findings at the sime of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate paties to a tran section form exercising all their rights and obligations under the transaction documents. This document is avised that inforduced exceptin full, without priors written approads the Company. Any unau tho fized alteration, forgery or falsification of the content or appearance of this document is unlawful and of enders may be prosecuted to the fullest extent of the law.

Report No.: T31620220028EM Page: 5 of 23

4.7 Test Facility

The test facility is recognized, certified, or accredited by the following organizations:

• FCC – CAB Registration No.: 446297

Measurement facility located at Fanling (Hong Kong), accredited as a Conformity Assessment Body (CAB) and was designated by FCC to perform compliance testing on equipment subject to Declaration Of Conformity (DOC) and Certification under Part 15 and 18 of the Commission's Rules.

This document is issued by the Company subject to its General Conditions of Sevice printed overleaf, available on nequestor accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-a-Document.aspx. Attention is drawn to the limitation of liability, inder militation and jurisdiction issues defined therein. Any holder of this document is avised that information contained hereon reflects the Company's findings at the sime of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonerate paties to a tran section form exercising all their rights and obligations under the transaction documents. This document is avised that inforduced exceptin full, without priors written approads the Company. Any unau tho fized alteration, forgery or falsification of the content or appearance of this document is unlawful and of enders may be prosecuted to the fullest extent of the law.

Report No.: T31620220028EM Page: 8 of 23

6 Test Results

6.1 Conducted Emissions Mains Terminals, 150 kHz to 30MHz

| Test Requirement: | FCC Part15 C |
|-------------------|----------------|
| Test Method: | ANSI C63.10 |
| Test Date: | Not Applicable |

Remark:

The product is battery operated and this test is not applicable.

6.2 Radiated Emissions below 30MHz

| Test Requirement: | FCC Part15 Subpart C Section 15.227 and 15.209 |
|-----------------------|---|
| Test Method: | ANSI C63.10 |
| Test Date: | 2016-06-16 |
| Frequency Range: | 9kHz to 30MHz |
| Measurement Distance: | 3 m |
| Detector: | Peak for pre-scan (200Hz resolution bandwidth for measurement between 9kHz – 150kHz) (9kHz resolution bandwidth for measurement between 150kHz – 30MHz) |
| | Peak for final measurement within the operation band Quasi-Peak for final measurement outside the operation band |

Limits :

(a) Measurement within operation band :

Average detector: $10000\mu V/m$ (or 80 dB($\mu V/m$)) at 3 m Peak detector: $100 dB(\mu V/m)$ at 3m

(b) Measurement outside operation band :

| | Frequency range | Field strength limits | Measurement distance | |
|-------|--|-----------------------|----------------------|--|
| | (MHz) | (µV/m) | (m) | |
| | 0.009 to 0.490 | 2400/F(kHz) | 300 | |
| | 0.490 to 1.705 | 24000/F(kHz) | 30 | |
| | 1.705 to 30.0 | 30 | 30 | |
| Note: | Note: At transitional frequencies the lower limit applies. | | | |

This document is issued by the Company subject to its General Conditions of Sewice printed overleaf, available on requestor accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx. Attention is drawn to the limitation of liability, inder militation and jurisdiction is sues defined therein. Any holder of this document is divised that information contained hereon reflects the Company's finding at the sime of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document do bigations under the transaction documents. This document cannot be reproduced except in full, without priorval of the Company. Any unauthorized alteration, to grey or falsification of the content or appearance of this document is unlawful and offendes may be prosecuted to the full est extent of the law.

Report No.: T31620220028EM Page: 9 of 23

6.2.1 EUT Operation

Operating Environment:

Temperature: 27 °C Humidity: 49 %

EUT Operation: Pre-test with Peak detector with the following mode(s): 1. Control for different direction with both control button or single button

> Final test with Peak detector with the following mode(s): 1. Control with up direction of left control button

6.2.2 Test Setup and Procedure

- 1. The pre-test of the radiated emissions test was conducted in a semi-anechoic chamber and the final measurement was conducted in the open area test site.
- 2. The EUT was operated with new battery. The EUT was placed upon a non-metallic table 0.8m above the floor.
- 3. A loop antenna for the frequency range 9kHz 30MHz, connected with 10 meters coaxial cable to the test receiver was used for measurement. The center of the loop was 1 m above the floor, positioned with its plane vertical at the specified distance and rotated about its vertical axis and placed horizontal for maximum response at each azimuth about the EUT.
- 4. An initial pre-scan was performed to find out the maximum emission level of the sample placed at 3 orthogonal planes and with the turntable rotated 360°. Final measurement was then performed to record

This document is issued by the Company subject to its General Conditions of Service printed overleaf, av allable on request or accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx. Attention is drawn to the limitation of liability, inder militation and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document does not exonentate paties to a transaction form exercising all their rights and obligations under the transaction documents. This document cannot be reproduced except in full, without prior written approval of the Company. Any unau tho ized alteration, to gery or falsification of the content or appearance of this document is unlawful and offendes may be prosculed to the fulles extent of the law.

Report No.: T31620220028EM Page: 10 of 23

the data for fundamental emission within the operation band and spurious emissions outside the band under worst-case condition for combination of the antenna orientation and turntable position.

5. Emission at the fundemental frequency for this pulse modulated device was measured with the peak detector function of the test receiver and was properly adjusted for the duty cycle correction factor as pulse desensitization to calculate the average emission value.

6.2.3 Measurement Data

An initial pre-scan was performed in the 3m chamber using the spectrum analyser in peak detection mode. The EUT was measured by loop antenna with 3 orthogonal polarities. Final measurement was conducted in the open area test site with data as follows:

(a) Measurement within operation band :

| Frequency (MHz) | <u>Antenna Polarity</u> | <u>Test Results (dBµV/m)</u> | | FCC Limit | <u>t (dBµV/m)</u> |
|-----------------|-------------------------|------------------------------|------------------|-------------|-------------------|
| | | <u>Peak</u> | <u>Average</u> * | <u>Peak</u> | <u>Average</u> |
| 27.145 | Horizontal | 50.89 | 46.64 | 100 | 80 |
| | Vertical | 59.49 | 55.24 | 100 | 80 |

Note : (1) The above peak value is the maximum value of the measurement in the 3 orthogonal planes

(2) * Calculation for radiation (average) :

Formula: Duty cycle = (N1L1 + N2L2 + ... + Nn-1Ln-1 + NnLn) / 100 or T where N1 is the number of type 1 pulse; L1 is length of type 1 pulse, etc. T is the period of the pulse train (if less than 100ms)

According to the time domain plots shown on the next two pages:

Duty cycle of the EUT = (1.58 x 4 +0.52 x 10) / 18.8 = 0.613

Av correction factor = $20 \times \log (0.613) \text{ dB}$ = - 4.25 dB

 $\begin{array}{l} \mbox{Radiation (average) = Radiation (peak) + Av correction factor} \\ \mbox{Radiation (average) of the EUT = 50.89 - 4.25 dB(\mu V/m) = 46.64 dB(\mu V/m) (Horizontal ant.)} \\ \mbox{= 59.49 - 4.25 dB(\mu V/m) = 55.24 dB(\mu V/m) (Vertical ant.)} \end{array}$

This document is issued by the Company subject to its General Conditions of Sewice printed overleaf, available on requestor accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx. Attention is drawn to the limitation of liability, inder militation and jurisdiction is sues defined therein. Any holder of this document is advised that information contained here on reflects the Company's side responsibility is to its Client and this document do bigations under the transaction documents. The Company's sole responsibility is to its Client and this document do bigations under the transaction documents. This document to advise that information contained hereept in full, without prior written approval of the Company. Any unau tho fized alteration, to gery or falsification of the content to appearance of this document is unlawful and offendes may be prosecuted to the full lest extent of the law.

(b) Measurement outside operation band : The spurious radiated emissions measured by the loop antenna were negligible (more than 20dB below limit), so the test data were not recorded in the test report.

Time Domain Plots (Fundamental frequency of Transmitter) :

Pulse cycle period = 18.8 ms

This document is issued by the Company subject to its General Conditions of Sewice printed overleaf, available on requestor accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx. Report No.: T31620220028EM Page: 14 of 23

Band Edges Plot:

The field strength of any emission within the operation band did not exceed 80 dB (μ V/m) for average value or 100 dB (μ V/m) for peak value.

From above plot, at the bandedge, 26.96MHz and 27.28MHz are more than 20dB down from the 27.145MHz carrier, which is below 49.5dBuV/m and met the requirement of 15.209.

This document is issued by the Company subject to its General Conditions of Sewice printed overleaf, available on request or accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Documenta.gxv. Attention is drawn to the limitation of liability, inder mification and jurisdiction issues defined therein. Any holder of this document is advised that information contained hereon reflects the Company's findings at the sime of its intervention only and within the limits of Clent's instructions, if any. The Company's sole responsibility is to its Client and this document does not exoneate parties to a tran section form exercising all their rights and obligations under the transaction documents. This document is unlawful and offendes may be prosecuted to the fullest extent of the law.

6.3 Radiated Emissions, 30MHz to 1GHz

| Test Requirement: | FCC Part15 Subpart C Section 15.209 |
|-----------------------|--|
| Test Method: | ANSI C63.10 |
| Test Date: | 2016-06-16 |
| Frequency Range: | 30MHz to 1GHz |
| Measurement Distance: | 3m |
| Detector: | Peak for pre-scan (120kHz resolution bandwidth) Quasi-peak for final test (120kHz resolution bandwidth) |

| Frequency range | Quasi-peak limits | |
|--|-------------------|--|
| MHz | dB (µV/m) | |
| 30 to 88 | 40 | |
| 88 to 216 | 43.5 | |
| 216 to 960 | 46 | |
| Above 960 | 54 | |
| Note: At transitional frequencies the lower limit applies. | | |

6.3.1 EUT Operation

Operating Environment:

Temperature: 27 °C Humidity: 49 %

EUT Operation: Pre-test with Peak detector with the following mode(s): 1. Control for different direction with both control button or single button

Final test with Quasi-Peak detector with the following mode(s):

1. Control with up direction of left control button

This document is issued by the Company subject to its General Conditions of Sewice printed overleaf, available on requestor accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx. Attention is drawn to the limitation of liability, inder militation and jurisdiction issues defined therein. Any holder of this document is advised that information contained here on reflects the Company's finding sat the limitation of liability, inder militation and jurisdiction issues defined therein. Any holder of this document is advised that information contained here on reflects the Company's finding sat the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document do bigations under the transaction documents. This document to anot be exproduced except in full, without prior written approach of the Company. Any unau tho fized alteration, to ng ery or tal sification of the content to rappearance of this document is u nlawful and o flenders may be prosecuted to the fullest extent of the law.

Report No.: T31620220028EM Page: 16 of 23

6.3.2 Test Setup and Procedure

- 1. The pre-test of the radiated emissions test was conducted in a semi-anechoic chamber and the final measurement was conducted in the open area test site.
- 2. The EUT was operated with new battery. The EUT was placed upon a non-metallic table 0.8m above the ground reference plane.
- 3. Bilog antenna was used for the frequency range from 30MHz to 1GHz
- 4. Before final measurements of radiated emissions, a pre-scan was performed in the spectrum mode with the peak detector to find out the maximum emissions spectrum plots of the EUT with located frequencies.
- 5. The actual frequencies of maximum emission were confirmed in the final radiated emissions measurement. At each frequency, the EUT was rotated 360°, and the antenna was raised and lowered from 1 to 4 meters in order to determine the maximum disturbance. Measurements were performed for both horizontal and vertical antenna polarization.

This document is issued by the Company subject to its General Conditions of Sewice printed overleaf, av allable on request or accessible at http://www.sgs.com/en/Terms-and-Conditions.aspx and, for electronic form at documents, subject to Terms and Conditions for Electronic Documents at http://www.sgs.com/en/Terms-and-Conditions/Terms-e-Document.aspx. Attention is drawn to the limitation of liability, inder mification and jurisdiction issues defined therein. Any holder of this document is advised that information contained here on reflects the Company's finding sat the time of its intervention only and within the limits of Client's instructions, if any. The Company's sole responsibility is to its Client and this document do bigations under the transaction documents. This document is and/conto the conduct decept in full, without prior written approach of the Company. Any unau tho fized alteration, forgery or falsification of the content or appearance of this document is u nawful and offenders may be prosecuted to the fullest extent of the law.

Report No.: T31620220028EM Page: 17 of 23

6.3.3 Measurement Data

An initial pre-scan was performed in the 3m chamber using the spectrum analyser in peak detection mode. The EUT was measured by Bilog antenna with 2 orthogonal polarities and frequencies of peak emissions from the EUT were detected within 6dB of the limit line. Final measurement was conducted in the open area test site with data as follows:

Test results on operation with up direction of left control button mode:

| Frequency (MHz) | Antenna Polarization | Correction Factor (dB/m) | Receiver QP Reading (dBµV) | Emission Level (dBµV/m) | Limit (dBµV/m) | Over Limit (dB) |
|--------------------|-------------------------|--------------------------------|----------------------------------|-------------------------------|-------------------|--------------------|
| 31.938 | Н | 18.6 | 3.9 | 22.5 | 40.0 | -17.5 |
| 40.063 | V | 15.4 | 4.4 | 19.8 | 40.0 | -20.2 |
| 46.125 | V | 13.3 | 4.2 | 17.5 | 40.0 | -22.5 |
| 68.063 | Н | 9.4 | 4.9 | 14.3 | 40.0 | -25.7 |
| 111.250 | V | 10.9 | 5.0 | 15.9 | 43.5 | -27.6 |
| 243.125 | V | 11.7 | 5.0 | 16.7 | 46.0 | -29.3 |

Note:

- 1) All readings are Quasi-Peak values.
- 2) Correction Factor = Antenna Factor + Cable Loss.
- 3) The above results were the worst case results with the EUT positioned in all 3 axis during the test. The EUT was positioned vertically and horizontally on the table for vertical and horizontal measurement respectively and with its antenna fully extended.

6.4 Radiated Emissions above 1 GHz

| Test Requirement: | FCC Part15 |
|-------------------|----------------|
| Test Method: | ANSI C63.10 |
| Test Date: | Not Applicable |

Remark:

There is no need for Radiated Emissions (above 1G) test to be performed on this product in accordance with FCC Part 15: 2013 because the tenth harmonic of the highest fundamental frequency is less than 1 GHz.

For further details, please refer to Subpart A section 15.33 (a) (1)of FCC Part 15 which states:

For an intentional radiator, the spectrum shall be investigated from the lowest radio frequency signal generated in the device, without going below 9 kHz, up to at least the frequency shown in the following table:

| Lowest frequency generated in the device | Upper frequency range of measurement | | |
|---|---|--|--|
| 9 kHz to below 10 GHz | 10th harmonic of highest fundamental frequency or to 40 GHz, whichever is lower | | |
| At or above 10 GHz to below 30 GHz | 5th harmonic of highest fundamental frequency or to 100 GHz, whichever is lower | | |
| At or above 30 GHz | 5th harmonic of highest fundamental frequency or to 200 GHz, whichever is lower, unless otherwise specified | | |

Frequency range of radiated emission measurements

Remark:Test frequency is 27.145 MHz.
