

5F63EA7

# SAND SHARK

## Contents

- RC Vehicle (Vehicle) x 1
- RC Transmitter (Transmitter) x 1
- Antenna for RC Transmitter x 1
- Instruction Manual x 1
- 6.4V Rechargeable Battery Pack x 1
- Charger x 1
- 9V Battery x 1

RC Transmitter x 1

RC Vehicle x 1

## BATTERY REQUIREMENTS:

## Battery Precaution

1. The 6.4V Lithium Rechargeable Battery Pack must be charged before use by utilizing the battery charger with included.
2. Do not overcharge the battery pack. Do not charge for more than 6 hours
3. Do not charge the battery pack if it shows leakage, corrosion, or has loose or exposed wires
4. Do not cover the battery pack with any sort of materials while charging
5. Do not touch the battery pack when it is hot. Wait until the battery pack cools before installing it in the Vehicle and before recharging
6. Do not dispose of the battery in fire
7. Do not dismantle the battery or charger, and do not cut the battery or charger cables
8. The battery pack will be warm after charging, and hot after use in a vehicle
9. The supply terminals are not be short-circuited
10. Rechargeable batteries are to be removed from the toy before being charged

11. Rechargeable batteries are only to be charged and adult.
12. Battery replacement must be done by adults
13. The transformer (charger) is not a toy
14. Charge only type (1300mAh Max.) rechargeable battery packs. Other types of batteries may burst causing injury. This power unit is intended to be correctly oriented in a vertical or floor mount position. This charger is intended to be used for charging 6.4V Lithium rechargeable battery pack with capacity 1300mAh Max. It cannot be used for charging non-rechargeable batteries. Regular examination of battery charger for any damage to their cord, plug, enclosure and other parts, and that, in the event of such damage, it must not be used with the charger or battery pack charge until such damage has been repaired. Note that the 9V battery is non-rechargeable and is not to be charged. Only batteries of the same or equivalent type as recommended are to be used. It will need replacement when transmission is poor. Exhausted batteries are to be removed from the product.
15. Regular examination of battery charger for any damage to their cord, plug, enclosure and other parts, and that, in the event of such damage, it must not be used with the charger or battery pack charge until such damage has been repaired. Note that the 9V battery is non-rechargeable and is not to be charged. Only batteries of the same or equivalent type as recommended are to be used. It will need replacement when transmission is poor. Exhausted batteries are to be removed from the product.

## Charging the Rechargeable Battery Pack for the Vehicle:

1. Connect the 6.4V Lithium rechargeable battery pack to the battery charger
  2. Plug the charger into the standard AC socket
  3. The charging time for a full charge is about 3 hours
  4. When charging is completed, unplug the charger from the AC socket
  5. Disconnect the rechargeable battery pack from the battery charger
- Note: Red LED Indicates the battery is charging.  
When LED turns green charging is complete.

## For Transmitter (Fig.3 and Fig.4)

1. Switch OFF the power
2. Unscrew the screw on the battery cover
3. Open the battery cover
4. Install 1 new 9V battery with correct polarity (+/-) as shown inside the battery compartment
5. Close the battery cover
6. Tighten the screw on the battery cover

Fig. 3

Fig. 4

## Battery Installation

### For Vehicle (Fig.1 and Fig.2)

1. Switch OFF the power
2. Unscrew the screw on the battery cover.
3. Open the battery cover.
4. Install 6.4V battery pack with correct polarities (+/-) as shown inside the battery compartment.
5. Close the battery cover.
6. Tighten the screw on the battery cover.

Fig. 1

Fig. 2

## How to Play

1. Switch ON the Vehicle and Transmitter.

2. Use the Steering Wheel to control the Vehicle turning left or right

3. Use the Accelerator Trigger to drive the Vehicle Forward, Stop and Backward

4. If the vehicle does not run in straight line, adjust the Direction Adjustment on the Vehicle chassis (For example, if the vehicle steers to the right, adjust direction switch to the left and vice versa.)
5. Play on smooth surface to have the optimum performance
6. Remember to switch OFF the power of the vehicle and transmitter after playing
7. The optimum control range is up to 130ft / 40m outdoor

### Braking Action

Keep driving forward rapidly then switch to backward for the braking action. When the trigger of the transmitter returns to the center position, push it again for the backward action.

### Performance Tips

1. Do not drive on grass, dirt, sand, dust, carpet or go through water
2. Do not drive in windy or rainy weather
3. Avoid direct impact with obstacles
4. Switch the power OFF when not in use to prevent damage due to battery leakage
5. Remove all batteries from the Vehicle and Transmitter when not in use for long period
6. Keep fingers, hair and loose clothing away from wheels
7. The operating range can be affected by a variety of factors
  - a) Low Voltage of batteries in Transmitter or Vehicle
  - b) Interference from other items that emit radio frequency signals
8. Outdoor usage is recommended in order to get optimum control range
9. Play with the vehicle on a clear, smooth surface
10. Clean the battery compartment to make sure it is free from dust to prevent poor battery contact

### Cautions

1. Do not attempt to disassemble the Vehicle or Transmitter
2. Do not operate the vehicle near player(s) operating vehicles of the same frequency. This can cause interference and may cause the vehicle to lose control.
3. Make sure the batteries are installed with correct polarities (+/-) as shown inside the battery compartment
4. Remove the package and take out all accessories before giving the Vehicle and Transmitter to child

### FCC label compliance statements

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
  - Reorient or relocate the receiving antenna
  - Increase the separation between the equipment and receiver
  - Connect the equipment into an outlet on a circuit different from that to which the receiver is needed
  - Consult the dealer or an experienced radio/TV technician for help

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### RSS-210 Compliance Statements

Under Industry Canada regulations, this radio transmitter may only operate using an antenna of a type and maximum (or lesser) gain approved for the transmitter by Industry Canada. To reduce potential radio interference to other users, the antenna type and its gain should be so chosen that the equivalent isotropically radiated power (e.i.r.p.) is not more than necessary for successful communication.

The device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

### Declaration of Conformity

The product is in conformity with the requirement of EU Directive 2014/53/EC

### Environmental notes:

The whole product also does not belong to household waste at the end of the product life.

You can return it at collection points for the recycling of electronic and electrical instruments

The symbol on the item, instruction manual, hangtag or packing is showing this clearly.

Materials should be recycled according to their respective markings.

Recycling of old devices or other residues of materials contained therein represents an important contribution to environmental protection.

Please ask at your local community for the correct collection point.

### Disposal of batteries

Batteries should not be disposed of in the household waste. As the consumer you are legally obliged to return batteries containing harmful substances and all other used batteries. You can hand in your old batteries at public collection points in your area or wherever batteries are sold.

You will find these chemical abbreviations along with a crossed-out refuse bin on batteries containing harmful substances:

Pb-Battery contains lead

Cd-Battery contains cadmium

Hg-Battery contains mercury

The packaging and instruction manual contain important information.

Please keep them for future reference.

Warning! Choking Hazard. Not suitable for children under the age of 3 years due to small parts.

We reserve the right to improve/extend specifications and colors without notice.

Warning! The Antenna of vehicle is not to be inserted into socket outlets.

Frequency band : 2405 - 2475 MHz  
Maximum Radio Frequency Power Transmitted : <0 dBm

6+

ToysRUs

CONFORMS TO THE SAFETY REQUIREMENTS OF ASTM F963.

Conform to other safety:

Do not sell and use toys, Do not sell, display, transport, use, or otherwise dispose of, or otherwise dispose of.
