Date: May 4, 2005

Subject: Xanboo Duty Cycle FCC ID OU4-XHA750

The XHA750 sends out a 20.5 millisecond system integrity packet every 15 minutes.

Maximum Duty Cycle (20.5 x 4) or 82 milliseconds per hour.

When manually arming or disarming the Xanboo security system, the packet includes the encrypted PIN number of the user. This packet is a maximum 5 Bytes longer, making a worse case packet length of 23.3 milliseconds.

Please let me know if I can help you with anyother questions.
