Lou,

I hope this helps. You already have the letter granting you authorization, so I think this will "close the loop". I have attached the message that is inline below as well, so that it can be used standalone for the FCC submission.

Best regards,

Matt

Matt

As the authorized GE Marquette Medical Systems FCC representative I grant you the authority to act in my behalf and sign any necessary FCC documentation for the Access Point submission for the ApexPro FH telemetry system. In addition I grant you the authority to transfer the authority to act in my behalf to third party organizations that are creating support materials to support the necessary FCC documentation for the Access Point submission.

Regards

Jeff Wells

Jeff,

Can you please send me an e-mail deputizing me to authorize Lou and USTech for the new AP FCC submission? The new proposed FCC ID in question is: OU507APFH-AP

Thanks and regards,
Matt

Hey Matt,

Tim is asking for something signed by Jeff Wells either authorizing me, or authorizing you to authorize me.

Thanks,

Lou

Hi Lou,

Unfortunately you've caught me in a bit of a bind here. My laptop lease was up and I just had a new one swapped in today. So right now I don't have Acrobat or much of anything else.

However, I can provide something like the attached if that will do -- let me know if you are looking for a different authorization: I think this is right.

Best regards,
Matt

Matt,

Tim is asking for a similar Agent Authorization letter, with the proper signatory, as was required for the SHU, listing me as Agent.

Can you send one to me?

Thanks,

Lou
