

## Declaration of Identity

We, **Omron Automotive Electronics Inc.**  
**3709 Ohio Street**  
**Saint Charles, IL 60174**

Declare on our sole responsibility that the following Wireless Control Modules (WCM) variants

**Small Car**  
**Truck**  
**JS**

are identical regarding:

- plastic material of the coil antenna form and cover,
- WCM plastic housing,
- low frequency coil antenna's physical and electrical parameters,
- PCB layout and components,

**The RF behavior of all three variants is identical.**

The only difference between Small Car and Truck applications is in the shape of plastic that supports the low frequency coil antenna.

The only difference between the JS version and Small Car / Truck version is the connection of the low frequency antenna connection on the PCB; therefore the JS version PCB has a single additional runner (~4 cm long) that interconnects the two locations. This additional runner is along the perimeter of the PCB and has no impact on the 125 kHz RF parameters.
