Subject: The ID number of the modified product

Dear Mr.Kuo

I will reply to you on the e-mail you sent to Ms.Itatsu.

1.FCC/TCB

(1) Question #1: The FCC ID number listed in the test report  
The test report which we have sent you on May is for the modified product.

This test report is not same for original product " G8D-522M-A".

When we offered the test of the modified product to the test laboratory, we thought that the same ID can be used for the modified product.

So FCC ID on the test report has been typed as "E4EG8D-522M-A".

(2) Question #2: The Proposed FCC ID label format  
We attach the revised label. Please see it.

(3) Question #3: User manual does not contain information  
We attach the caution. Please see it.

Best regards  
Yasuhide Yomo
