

## User Manual (GGM-M010)

UNIT COMP REMOTE

The system of REMOTE consists of UNIT COMP REMOTE (REMOTE), a smartphone, and some units in a vehicle. REMOTE uses Bluetooth<sup>®</sup> low energy technology for the wireless communication with the smartphone, while CAN is used to communicate with the units in the vehicle. The smartphone registered in REMOTE transmits commands via REMOTE to communicate with the units in the vehicle.

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

- 1. This device may not cause harmful interference, and
- 2. This device must accept any interference received.

## FCC CAUTION

Changes or modification not expressly approved by the party responsible could void the user's authority to operate the equipment.

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter. This device comply with FCC radiation exposure limits set forth for an uncontrolled environment and FCC radio Frequency (RF) Exposure Guidelines and have very low levels of RF energy that is deemed to comply without testing of specific absorption rate (SAR).

This device should be installed and operated with minimum distance 10mm between the radiator & human body.
