Federal Communications Commission
Washington, DC

To Whom It May Concern:

ADC is submitting this FCC Type Acceptance report for the 425A, a 500-watt VHF television transmitter. We are applying for a low-power television license for this high-band VHF transmitter.

The 425A is a complete 500-watt VHF solid-state internally diplexed television transmitter. It operates at a nominal visual output power of 500 watts peak sync and an average aural output power of 50 watts, at an A/V ratio of 10 dB, 10% sound, or 25 watts at 13 dB, 5% sound.

If you have any questions about this submission, please contact me at (724) 941-1500, extension 211.

Sincerely,

Lance Trussa
Design Engineer
