Federal Communications Commission
Washington, DC

To Whom It May Concern:

ADC is submitting this FCC Type Acceptance report for the 835-3, a 3,000-watt UHF television transmitter. We are applying for a low-power television license for this UHF transmitter.

The 835-3 is a complete 3,000-watt UHF solid-state internally diplexed television transmitter. It operates at a nominal visual output power of 3,000 watts peak sync and an average aural output power of 150 watts, at an A/V ratio of 13 dB, 5% sound.

If you have any questions about this submission, please contact me at (724) 941-1500, extension 211.

Sincerely,

Lance Trussa
Design Engineer
