Federal Communications Commission  
Washington, DC

To Whom It May Concern:

ADC is submitting this FCC Type Acceptance report for the 840A, a 10,000-watt UHF television transmitter. We are applying for a low-power television license for this UHF transmitter.

The 840A is a complete 10,000-watt UHF solid-state internally diplexed television transmitter. It operates at a nominal visual output power of 10,000 watts peak sync and an average aural output power of 1000 watts, at an A/V ratio of 10 dB, 10% sound.

If you have any questions about this submission, please contact me at (724) 941-1500, extension 211.

Sincerely,

Lance Trussa  
Design Engineer
