Washington, DC 20554

Gentlemen:

Axcera is submitting this FCC Type Acceptance report for the LHV20AL, a 20-watt VHF television translator. We are applying for a low-power television, type acceptance approval for this VHF translator. The FCC identifier selected for this product is OUSLHV20AL.

The LHV20AL is a complete 20-watt VHF solid-state translator. It operates at a nominal visual output power of 20 watts peak sync and an average aural output power of 2 watts at an A/V ratio of 10 dB, 10% sound.

The translator may also be operated at 1 watt peak sync with an average aural output power of 100 milliwatts, at an A/V ratio of 10dB, 10% sound with equivalent or improved performance. This is achieved by adding attenuators to the output of the amplifier.

The enclosed application and test data report are intended to demonstrate compliance with FCC guidelines.

Please contact me if you have any questions or if you need additional information. I can be reached by fax at (724) 873-8105 or phone at (724) 873-8100, extension 211.

Sincerely,

A handwritten signature in cursive script, appearing to read "Lance Trussa", is written over a horizontal line.

Lance Trussa
