Intertek
2307 E. Aurora Road, Unit B7
Twinsburg, Ohio 44087

Dear Intertek:

Axcera is submitting this FCC Equipment Authorization report for the LHV66ATD, a 66-watt VHF high-band digital television transmitter. We are applying for a low-power television, type acceptance approval for this VHF transmitter. The FCC identifier selected for this product is OUSLHV66ATD.

The LHV66ATD is a complete 66-watt VHF solid-state digital transmitter. It operates at a nominal output power of 66 watts average, while meeting or exceeding the FCC stringent mask requirements.

The transmitter may also be operated at 6.6 watts average with equivalent or improved performance.

The enclosed application and test data report are intended to demonstrate compliance with FCC guidelines.

The enclosed report uses a format that we currently use to file directly with the FCC. We hope that this format will also be suitable to Intertek.

Please contact me if you have any questions or if you need additional information. I can be reached by fax at (724) 873-8105 or phone at (724) 873-8100, extension 233.

Sincerely,

A handwritten signature in dark ink, appearing to read 'D. Brooking', is written over a horizontal line.

David Brooking
Principal Engineer
