

Re: Class 2 Change Request  
Applicant: Kyocera Wireless Corp.  
FCC ID: OVFKWC-7135

To : Federal Communications Commission  
Authorization and Evaluation Division

Kyocera Wireless Corp. (KWC) requests a Class 2 Permissive change for wireless handset model 7135.

The following revision was made to the product to improve paging receiver performance:

- Antenna spring (helix) size increased for improved retracted position antenna efficiency.

The handset with the new antenna is pictured below. No other product changes were implemented.

Radiated emission test and SAR test were re-performed and confirmed compliance with respect to the FCC requirements. The test report is attached.
