## Changes in OW3NEM-2

### RF

Antenna switch version upgrade, identical characteristics.

SIM reader capacitor changed, added capacitor to reduce second harmonic in 1900 MHz band.

### BB

Changed layout for the VSIM capacitor - changed the ground connection.

Changed the USB circuitry to comply with the USB standard.

## Results of internal review (FCC focus)

No SAR testing required.

Part 24 radiated emissions testing required for SIM cap change.

No other testing required
