We are requesting certification under Part(s) of the Commission's Rules listed above to allow operation of this equipment.

Barrett Communications Pty Ltd hereby certify that all 4050 units bearing the FCC logo will contain a software region lock that will prevent the product being used in a manner contrary to that allowed by FCC Part 87 and Part 90 rules. This software region lock will restrict modification of the following Software definable RF parameters:

All FCC 4050s are shipped from the factory pre-programmed with only authorized frequencies and are not modifiable by end users. The 4050 transceiver is only supplied by authorized dealers who program the radio's frequencies to ensure that frequencies are restricted to only those licensed to the end-user.

Barrett Communications Pty Ltd also requests that the FCC certify this product for the entire 1.5 MHz to 30 MHz band to meet the requirements of users authorized to operate between 1.5 MHz and 2.0 MHz as allowed by Title 47 CFR § 2.106.
