Barrett Communications Pty Ltd requests that the FCC certify this product for the entire 1.5MHz to 30MHz band to meet the requirements of users authorized to operate between 1.5MHz and 2.0MHz as allowed by Title 47 CFR § 2.106.

This would be done to facilitate the requirements of agencies covered under NTIA spectrum usage. Government agencies complying with the NTIA instead of the FCC must purchase their equipment from private industry manufacturers who are governed under FCC rules. The conflict in spectrum allocation detracts from the options available to the government agencies for commercial off the shelf equipment which meets their required specifications such as the Department of Interiors. Please see frequency lists on next page.
