M/A-COM seeks application approval for a Class 2 Permissive Change on the J725M 800 MHz Public Safety mobile radio.

Exhibits include photographs, schematics, parts list, and test report.

This change is due to PA component obsolescence and the need for M/A-COM to provide replacement parts for fielded customer radios. No board artwork has been changed. No operational modes have been added. No driver stages have been added. The test report shows no degradation of mask compliance, nor other performance characteristics, previously reported.

Confidentiality letter and Rhein Tech Laboratories, Inc. agent authorization letter to act on M/A-COM's behalf for this revision, have been provided.

Thank you for your kind consideration and timely review of this Class 2 Permissive Change to M/A-COM's radio product family.

Sincerely,

A handwritten signature in black ink that reads "Daryl S. Popowitch".
