

American Telecommunications Certification Body Inc.

6731 Whittier Ave, McLean, VA 22101

May 19, 2003

RE: FCC ID: OWDTR-0016-E

Attention:

I have a few comments on this Application.

1. Please note that Part 90 licensed devices are to use antenna substitution method for radiated spurious emissions. While section 9 appears to be the substitution method, sections 4 and 6 are not. Please explain.

Response: This was an error. Please refer to the revised test report uploaded with this response.

2. Please note that the test date on the report is April, 2003 and the cal due date for the power meter and power sensor is Feb 2003. Please provide data using calibrated equipment.

Response: The calibration date was incorrect. Please refer to the revised test report uploaded with this response.

3. Is the output power continuously variable? If so, by how much?

Response: The output power is not continuously variable.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted. Any questions about the content of this correspondence should be directed to the sender.
