Class II Permissive Change

M/A-COM seeks Grant of Equipment Authorization for P7100<sup>IP</sup> UHF-L (421 - 430 MHz) portable radio and consideration of the exhibits filed for a Class II Permissive Change.

Due to component obsolescence, the power amplifier module has been replaced. An additional microphone has been added to the product accessories as well.

Exhibits include photographs, updated schematic, updated parts list, updated SAR report for measurements made with the new power amplifier module and microphone, and measurement data report for appropriate Part 90 tests performed.

Confidentiality letter and Rhein Tech Laboratories, Inc. agent authorization letter to act on M/A-COM's behalf for this original submission, have been provided as exhibits as well.

Thank you for your kind consideration and timely review of this change.

Sincerely,

A handwritten signature in black ink that reads "Daryl S. Popowitch". The signature is written in a cursive, slightly slanted style.
