Subject: FCC ID: OWDTR-0022-E
Class II Permissive Change

M/A-COM seeks an Equipment Authorization Grant change for M7100^{IP} 800 MHz (806 - 870 MHz; 10 - 35 Watt) mobile radio.

The Commission's action specified in FCC 04-168 reconfigures the 800 MHz Public Safety band frequency assignments. Conversion of licensed system assignments is to be performed on a phased basis, nationally, as administered by the appointed Transition Authority.

This change expands the previously Granted modes and emission designators, to apply across the band. No changes have been made to the product, nor accessories.

Rhein Tech Laboratories, Inc. agent authorization letter to act on M/A-COM's behalf for this modification, has been provided as an exhibit. Confidentiality is not requested for documents submitted under this action.

Thank you for your kind consideration, timely review and processing of this modification, enabling M/A-COM to service customer needs.

Sincerely,

A handwritten signature in black ink that reads "Daryl G. Popowitch". The signature is written in a cursive style with a large, stylized "D" and "P".

Daryl Popowitch
