Class 2 Permissive Change request

A Class 2 Permissive Change is requested for the addition of a yagi antenna for end user applications of the M7300 mobile radio when configured in Control Station applications. The CS7000 control station equipment is a variation of the M7300 mobile radio and is considered a fixed station end user application. The desktop control station yagi antenna MPE assessment would be done at the time of site licensing, as with other fixed station deployments, with consideration given to the installation environment and co-location; Grant notes are requested to be updated to reflect such and allow user application of the CS7000 with a yagi antenna.

Sincerely,

A handwritten signature in black ink that reads "Daryl G. Popowitch". The signature is written in a cursive, flowing style.

Daryl Popowitch  
Regulatory Manager
