ATTESTATION

Compliance to requirements for Part 80 and Part 90 Power Limits

- a. Harris attests that we comply with the Part 80 requirement which limits power to 4 Watts/ERP 2 Watts under certain uses. Harris' radio programming application, allows power level to be set per channel, per frequency, and that enables us to reduce power for these channels where applicable.

- b. Harris attests that we comply with the Part 90 requirement which limits power to 1W ERP or 2 W ERP depending on band of operation and service areas. Harris' radio programming application, allows power level to be set per channel, per frequency, and that enables us to reduce power for these channels where applicable.
