File Number: *FCC ID: OWS-963*
Subject: *900 MHz Radio Application for Grant of Equipment Authorization*

To Whom It May Concern,

On behalf of Silver Spring Network, Inc., ITC is submitting this application for a Grant of Equipment Authorization pursuant to Part 2.1033 and 15.247 of the Rules and Regulations of the FCC, regarding Intentional Radiators. The subject device operates in the frequency band of 902 MHz to 928 MHz. It is a low-power transmitter module which attaches to a gas meter and counts pulses. The device then communicates its data on a Local Area Network composed of Relays and Gateways to a remote location.

The enclosed documents and data in this submittal package demonstrate that the equipment tested complies with the FCC Rules Part 15, section 247 for devices operating under the provisions of this part.

This application was prepared by ITC Engineering Services (ITC). If there are any questions or if further information is needed, please call us at (925) 862-2944 or fax (925) 862-9013. Thank you.

Yours sincerely,

Bandele Adepoju
