Inquiry:

Refer to the attached document for details.

The manufacturer would like to use the same label for both the board alone and the board in the plastic box. The plastic box label will be on the exterior surface and will be visible after installation. In other words, the manufacturer would like to save the expense of placing a "Contains FCC ID:" label on the plastic box.

Question1: If the information regarding the plastic box and how it is labeled is documented in the certification filing, can we use the same FCC ID for both the board alone and the board in the plastic box?

Question2: If the answer to question 1 is "Yes", can the "Contains FCC ID:" label be eliminated if the FCC ID label is clearly visible after installation?

Response:

In response to your inquiries: Question1: If the information regarding the plastic box and how it is labeled is documented in the certification filing, can we use the same FCC ID for both the board alone and the board in the plastic box? Yes, but the wording "Contains FCCID:" must be on the plastic box.

Question2: If the answer to question 1 is "Yes", can the "Contains FCC ID:" label be eliminated if the FCC ID label is clearly visible after installation? Only if it's in a user accessible location.
