Attention: Application Examiner

RE: Request for confidentiality per FCC Rule Sections 0.457 and 0.459
Applicant: **Silver Spring Networks Inc.**
FCC ID: OWS-IMU518
IC: 5975A-IMU518

To whom it may concern,

Request is hereby submitted, on behalf of my client **Silver Spring Networks** to permanently withhold from public review certain portions of the application for equipment certification for the referenced FCC identifier. The referenced product is a 900MHz FHSS gas meter radio module for which modular approval is sought. In particular, the following sections of the application and report are requested to be kept confidential:

Operational Description
Schematic
Block Diagram
Internal photographs

Justification for keeping internal photographs confidential

This product is not sold to the general public, it is made available only to utilities and gas companies. There are no serviceable parts except for the battery which is designed for a 20-year life before replacement. In addition the circuits under the shields are filled with waterproof potting material.

Silver Spring Networks has invested considerable time and materials in research and development to produce the referenced product. Disclosure of the confidential portions of this application to competitors would give them unfair competitive advantages in developing similar products.

If you have questions or need further information, please contact the undersigned.

Sincerely,

THOMAS N. COKENIAS
EMC Consultant/Agent for Silver Spring Networks
