September 3, 2007

RE: Silver Spring Networks

FCC ID: OWS-NIC502

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Please review your Form 731, Canada application form, the RF Exposure exhibit, and your Test Report. What is the RF power associated with this device?
- 2.) The Test Report and the MPE exhibit appear to indicate that this is a Module. If so, please provide a modular approval request letter.
- 3.) Please review the Canada application form. Please provide phone and fax number for Elad Gottlib. If this contact has changed, then kindly inform IC.
- 4.) Please review your emission designator. Most frequency hoppers are not F1D. Are you certain of your request?
- 5.) Please note that Canada requires the use of RSS-210, Issue 7 which was published June 2007. Please review and correct your filing as appropriate. Please make sure your FCC/IC cross reference sections are correct.

William H. Graff
President

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
