Subject: Power supply for Silverspring eBridge.

Tim,

In response to your inquiry regarding the operating supply for the Silverspring Networks eBridge. It operates on 10.0 VDC

The operating voltage range is very narrow.

An attempt was made to find a small inexpensive AC adapter at 10VDC at local electronics supply stores (new and surplus equipment).

No AC adapter with the required specific operating voltage was available. Given this, the device was tested using a typical bench supply.

If there are any other questions or concerns, Please do not hesitate to contact me.
