Attn: OET Dept.

Ref: FCC Class II Permissive change for FCC ID: OWS-NIC511-LTE

Applicant: Itron, Inc

Dear Examiner,

This is to request a Class II Permissive change for FCC ID: OWS-NIC511-LTE originally granted on 03/13/2017 (date).

The change under this application is to add the additional modes (PHY) to the existing grant. There has been no modification or change in hardware and the device is electrically identical to what was previously granted.

Additionally, the device was originally granted under company name Silver Spring Networks but the grantee has since undergone a name change. As the device itself has not been modified, the external photos, internal photos, and RF exposure from the original filing still apply.

I attest that the certified device will not be capable of ad-hoc mode operation outside of the grant conditions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Asim Tirmizi".

Name: Asim Tirmizi

Date: 8 February 2023
