		als under paragraph (b)						
	of this section.	1 6 1 ()						
5	The modular tra	insmitter must be tested	The module was tested stand alone,	YES				
	in a stand-alone	configuration, <i>i.e.</i> , the	connected to control pc via serial cable					
		ot be inside another						
		esting for compliance						
	-	uirements. Unless the						
		ule will be battery						
		st comply with the AC						
		requirements found in						
		AC or DC power lines						
	_	output lines connected to st not contain ferrites,						
		be marketed with the						
	_	ction 15.27(a)). The						
	,	lines shall be the length						
	_	l use or, if that length is						
	• •	st 10 centimeters to						
		e is no coupling between						

	4		
	the case of the module and supporting		
	equipment. Any accessories, peripherals,		
	or support equipment connected to the		
	module during testing shall be unmodified and commercially available		
	(see Section 15.31(i)).		
6	The modular transmitter must be	The RF module label is submitted as a	YES
	equipped with either a permanently	separate exhibit.	1120
	affixed label or must be capable of	separate eximit.	
	1	If the module FCC ID is not visible on	
	electronically displaying its FCC identification number.		
	(A) If using a permanently affixed label, the	the product containing the module,	
	modular transmitter must be labeled with its own	Section 4.1 of the installation manual instructs final users to affix a label on	
	FCC identification number, and, if the FCC		
	identification number is not visible when the	the exterior surface of the product that	
	module is installed inside another device, then	states	
	the outside of the device into which the module is installed must also display a label referring to	Contains FCC ID: OWS-NIC714	
	the enclosed module. This exterior label can use		
	wording such as the following: "Contains	IC: 5975A-NIC714	
	Transmitter Module		
	FCC ID: XYZMODEL1" or "Contains FCC ID:		
	XYZMODEL1." Any similar wording that expresses the same meaning may be used.		
	The Grantee may either provide such a label, an		
	example of which must be included in the		
	application for equipment		
	authorization, or, must provide adequate		
	instructions along with the module which explain this requirement. In the latter case, a copy of		
	these instructions must be included in the		
	application for equipment authorization.		
	(B) If the modular transmitter uses an electronic		
	display of the FCC identification number, the		
	information must be readily accessible and visible on the modular transmitter or on the		
	device in which it is installed. If the module is		
	installed inside another device, then the outside		
	of the device into which the module is installed		
	must display a label referring to the enclosed		
	module. This exterior label can use wording such		
	as the following: "Contains FCC certified transmitter module(s)."		
	Any similar wording that expresses the same		
	meaning may be used. The user manual must		
	include instructions on how to access the		
	electronic display. A copy of these instructions		
	must be included in the application for equipment authorization.		
7	The modular transmitter must comply	The module is installed only in products	YES
_ ′	with any specific rules or operating	manufactured by the grantee and under	110
	requirements that	the grantee's control, in keeping with the	
	ordinarily apply to a complete	requirements for a limited modular	
	transmitter and the manufacturer must	approval. The grantee has internal	
	provide adequate instructions along with	manufacturing processes and	
	the module to explain any such	documentation for control of final	
	requirements. A copy of these	products using this module.	
	instructions must be included in the	products using this module.	
L	monactions must be included in the		

	application for equipment authorization.		
8	The modular transmitter must comply	The module complies MPE limits as	YES
	with any applicable RF exposure	stated in the product manual when	
	requirements in its final configuration.	operating at maximum allowed power	

A **limited modular approval** may be granted for single or split modular transmitters that do not comply with all of the above requirements, *e.g.*, shielding, minimum signaling amplitude, buffered modulation/data inputs, or power supply regulation, if the manufacturer can demonstrate by alternative means in the application for equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the operating conditions in which the transmitter will be used. Limited modular approval also may be granted in those instances where compliance with RF exposure rules is demonstrated only for particular product configurations. The applicant for certification must state how control of the end product into which the module will be installed will be maintained such that full compliance of the end product is always ensured.
