Attention: Joe Dichoso
Re: OWS-925 C&I Radio without pager

Mr. Dichoso:

The C&I product functions completely without the pager installed. The pagers, as the Operating Manual indicates, is an optional means to relay information to and from the wide area network (WAN). Without a pager, the data is forwarded to our Gateway product via the 900 MHz ISM transceiver. The Gateway contains a MODEM that communicates with the WAN.

Sincerely,

A handwritten signature in black ink that reads "Michael Gbadebo". The signature is written in a cursive style and is underlined.

Michael Gbadebo
