Input audio signal is converting to composite signal with FM modulation.

It' s modulated FM RF signals transmitting to any FM receiver such as car FM stereo receivers or home FM stereo receivers.

## Specifications

- 1) Modulation : Frequency Modulation
- 2) Carrier OSC : PLL Synthesized
- 3) Transmission Frequencies : 88.1 / 88.3 / 88.5 / 88.7 / 88.9MHz
- 4) DC Power Input : DC +12V
- 5) Clock & Other Frquencies Utilized : 7.6MHz
- 6) FM Deviation : 190KHz(Max)
- 7) Audio Input Signal Level :775mV (1V P-P)
