Subject: FCC ID: OXZSTDPREVIEW

To whom it may concern,

During the EMI testing of the subject device, the following modification was required for compliance:

- Added ferrite core around signal and power cable.

The product currently utilizes this version of cable with the ferrite. During EMI testing our goal was to utilize a cable without this ferrite, but testing showed the ferrite was required. This modification will be implemented in all production units of the subject device. Alternately, different modifications may be used if they are tested and verified to produce the same or lower level of emissions.

Sincerely,

A handwritten signature in blue ink, appearing to read "Dale Hessing", with a stylized flourish at the end.

Dale Hessing
Director of Engineering
