Re: FCC ID: OXZWBPV2006

To whom it may concern,

The Preco WideBand PreView system will be produced in three different models - WBPV2010, WBPV2015, and WBPV2020. All models use the exact same hardware with the only differences being the software that limits the maximum detection range. The tested device scans out to 30 feet and software in the sensor limits the detection range.

Sincerely,

A handwritten signature in blue ink, appearing to read "Dale Hessing".

Dale Hessing
