Re: FCC ID: OXZWZPV2009

To whom it may concern,

The Preco WorkZone PreView system will be produced in three different models – WZPV4010, WZPV4015, and WZPV4020. All models use the exact same hardware with the only differences being the software that limits the maximum detection range. The tested device scans out to 20 feet and software in the sensor limits the detection range.

Sincerely,

A handwritten signature in purple ink, appearing to read "Dale Hessing", with a stylized flourish at the end.

Dale Hessing
Vice President of Blind Spot Safety
